

The role ERP systems play in A&D manufacturing success

Digital transformation: Easier said than done

60%

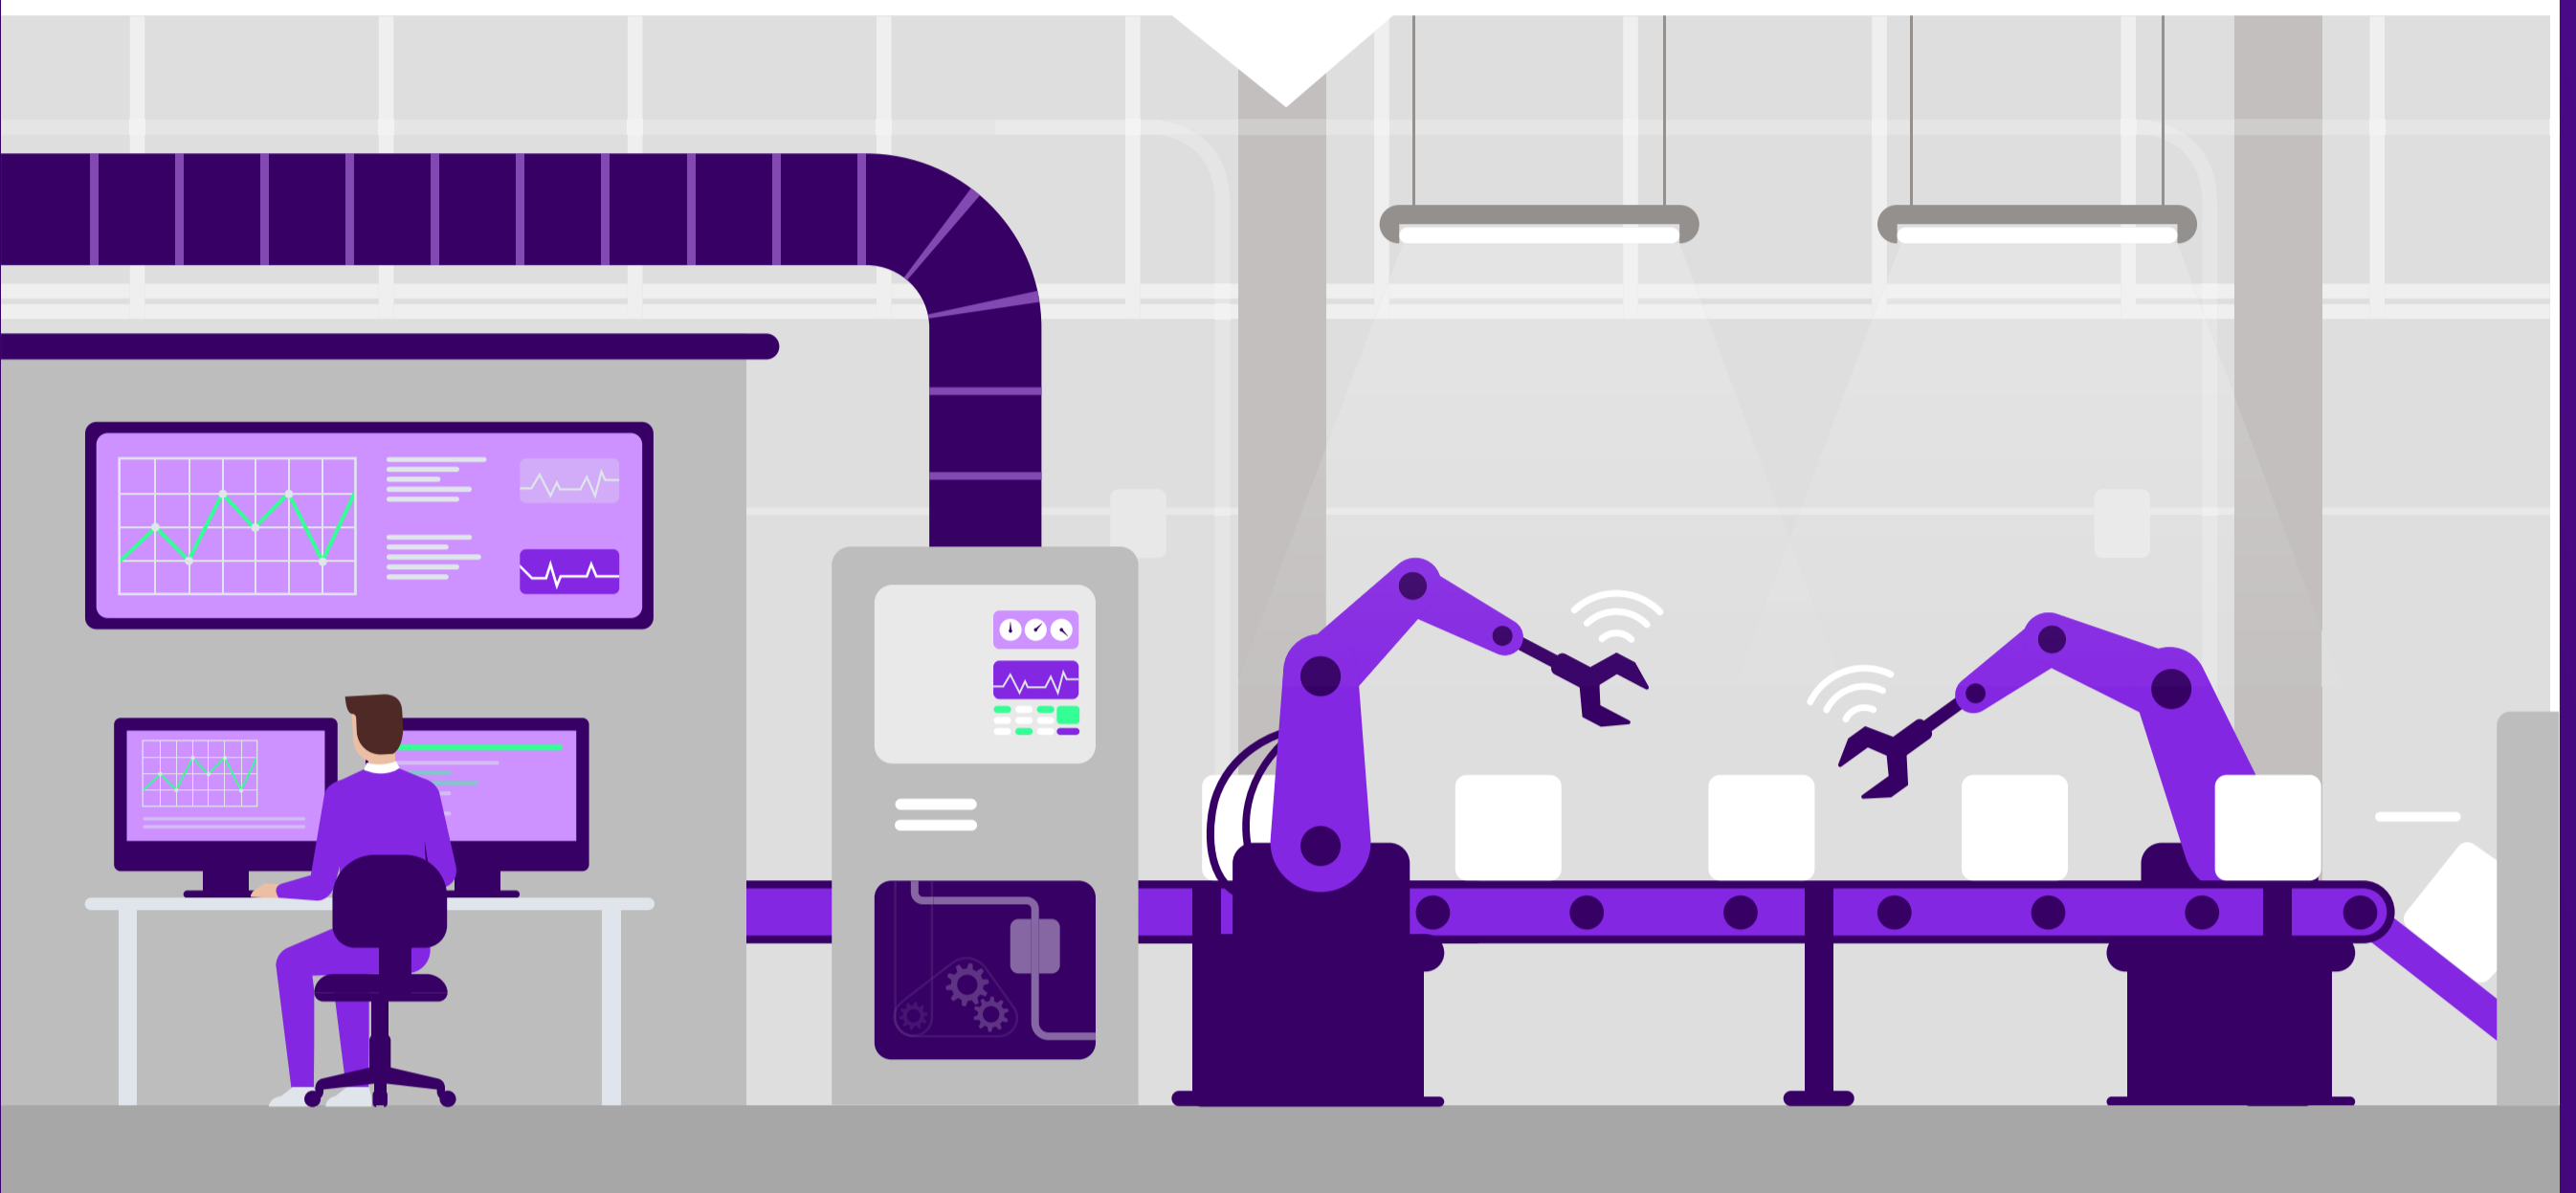

Of digital transformation projects are over budget

34%

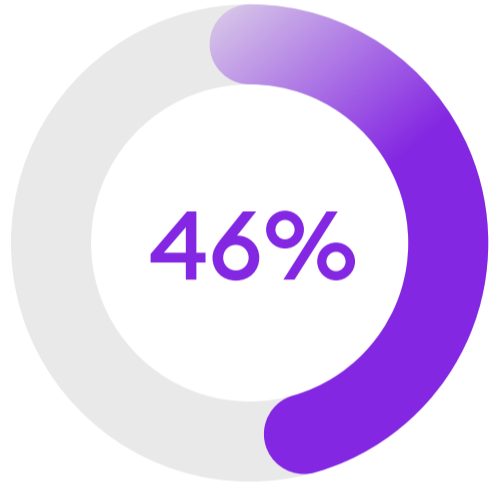

Of failures take 2-3 years to recover

25%

Of failures lead to loss of customers

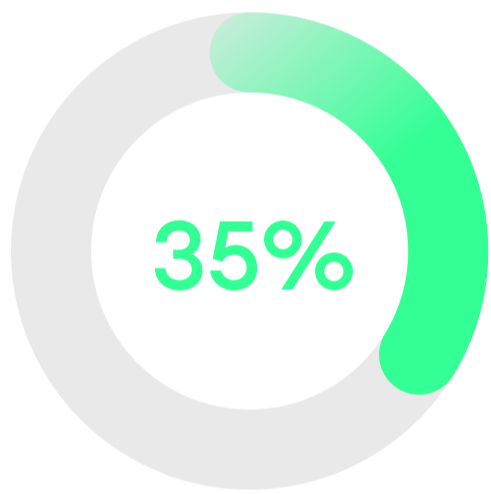

It all starts with your ERP system

of A&D Manufacturers say their current ERP platform **hinders their ability to adapt to changing market demands**

of A&D manufacturers have successfully altered production to meet changing market demands during **COVID-19**

of A&D Manufacturers have a **desire to improve their capability to onboard new technology** such as IoT and AI

Critical ERP choices facing A&D manufacturers

Unique industries need unique software

An out-of-the box approach doesn't work for an industry that requires purpose-built solutions

A common interface doesn't mean a connected operation

General purpose ERP suites made up of disparate apps make achieving digital transformation difficult

Breaking down silos to make more informed decisions

A fully integrated ERP enables A&D manufacturers to increase efficiencies and gain business intelligence

Hyper security and compliance

A&D requires more stringent security than any other sector with evolving regulatory oversight and compliance
