

Full integration between the maintenance and safety processes at Vesta Terminals

Vesta has an ongoing commitment to improve the quality of its services, while protecting people and the environment. Ensuring health, operational safety, environmental protection, quality enhancement, customer satisfaction and community well-being is at the heart of Vesta's corporate mission.

Improve services

Due to great commitment, a clear vision and smart automation, Vesta Terminals was able to professionalise the processes for Maintenance, Work Permits, HSE Incident Management and Management of Change. These improvements have led to a better collaboration and communication between the maintenance department, operations and the prevention department. The policy of continuous improvement is implemented in an international context with the associated cultural differences. In order to manage this policy, clear KPIs are of great importance, as well as an effective 'Plan-Do-Check-Act cycle'.

These improvements have led to a better collaboration and communication between several departments.

Vesta Terminals about the use of IFS Ultimo.

Great benefits

The Ultimo software supports Vesta to continuously manage and improve efficiency, control, compliance, planning and budgeting. The full integration between the Maintenance and Safety processes and the possibility to work on-the-go provide great benefits for the Vesta organization.

About Vesta Terminals

Vesta Terminals offers its customers safe and reliable logistics services in the form of storage and transshipment primarily for crude oil, refined petroleum products, bio fuels and petrochemicals. Vesta owns and operates three storage terminals in Antwerp, Vlissingen and Tallinn with a total capacity of over 1.6 million cubic metres.

VESTA

Achieved results:

- Between 20 and 30% efficiency gains through the integrated use of Ultimo in the field of Asset Management and HSE.
- Between 10 and 20% less downtime through the use of Ultimo at three sites.
- Between 20 and 30% cost savings through a more professional approach to maintenance management.
