

# 10 THINGS ABOUT IFS APPLICATIONS™ 10

that help you connect to the future...

## 1 ENGAGE EVERYONE

Everyone will love our brand new, intuitive user experience called IFS Aurena™. IFS Aurena means that whether in the field on a phone, the factory on a tablet or the office on a desktop, your people will enjoy the same functionality, improving productivity and making faster, better decisions.

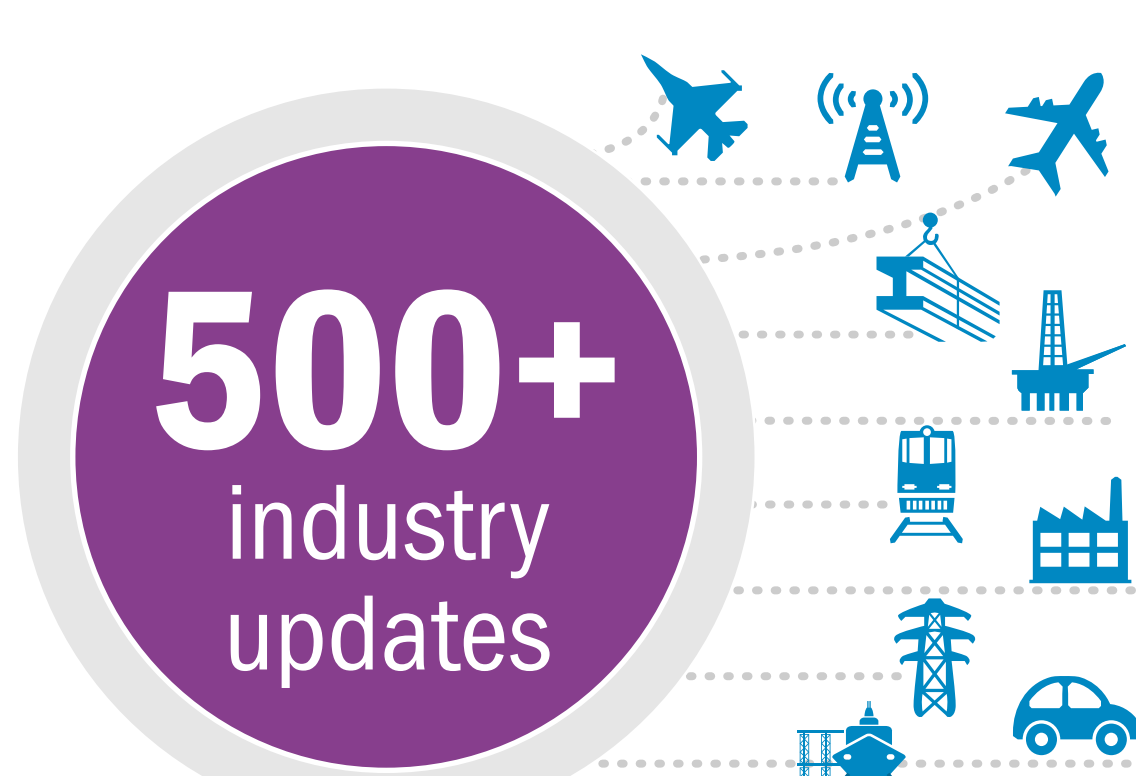

## 2 THINK GLOBAL, ACT LOCAL

Expand your business easily across international boundaries by having a single global strategy that allows for country-specific requirements, so you can focus on your core business, wherever you are in the world.

## 3 SHAPE WHAT COMES NEXT

Productivity increases through numerous functional updates like easier staffing and organization, more integrated global financials and business planning, as well as improved maintenance planning and fleet and asset management—all based on IFS's industry expertise.

## 4 PRODUCE CUSTOMIZED GOODS

Product estimate management enables faster, more accurate responses to requests for new or amended product quotes. Demand Driven MRP (Material Requirements Planning) reduces the risk of component shortage that may arise from more individualized orders.

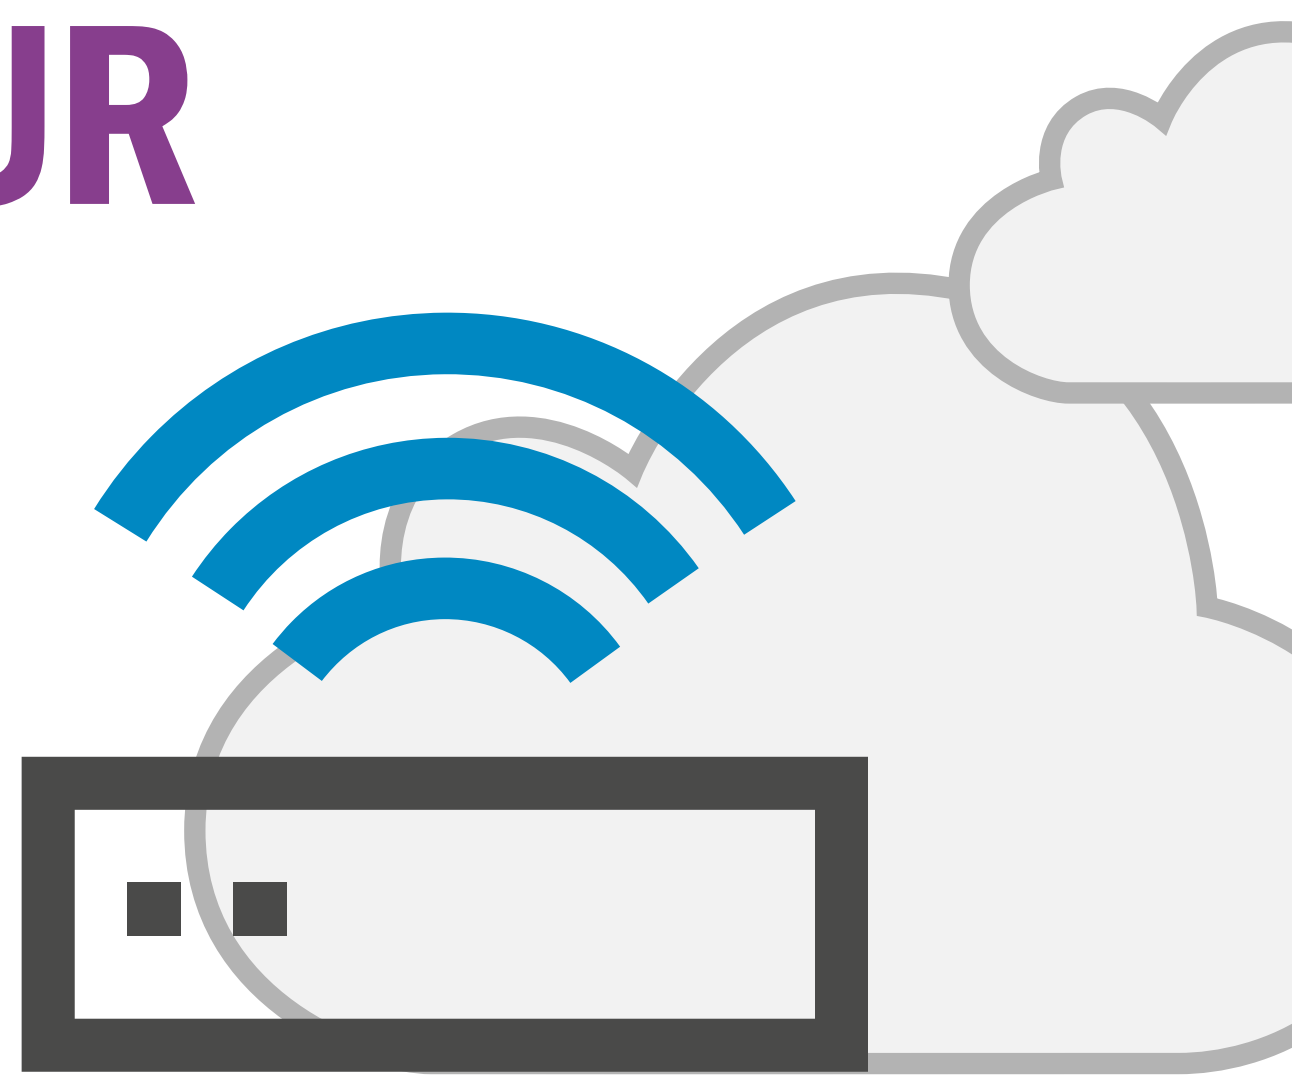

## 5 REALIZE OPPORTUNITIES

Today, the focus is more on service, not products, especially for manufacturing companies. IFS Applications provides the end-to-end solutions to fully realize the opportunities of operating in a digital, service-driven world.

## 6 CONNECT YOUR ASSETS

By leveraging our IoT technology and real-time data analysis, events are generated so you see the current state of your business and can automate business processes.

## 7 OPTIMIZE OPERATIONS

IFS Applications is designed to optimize operations today, for better outcomes now and in the future. Whatever your industry, IFS Applications can adapt to work the way you do. Great solution fit and last mile functionality will help you better serve your customers and stand out from the competition.

## 8 RUN YOUR WAY

Choose how you want to connect to the future with IFS Applications 10: available in the Cloud as a managed service, Software as a Service, or—if you prefer—on-premise.

## 9 CONNECT THE CORE

Extend on the outside, tailor on the inside. IFS Applications allows you to do this through configurations, a Layered Application Architecture (LAA) and an evergreen approach with quarterly updates.

## 10 INVEST IN YOUR PEOPLE

IFS Applications lets you easily manage your global competency needs, enables enhanced and simplified employee and organizational management and improves the user experience for casual users so you can accurately measure the current value of your staff and enhance their future potential through investments.
