IFS Cloud Sustainability Planner

Making ESG information easier to collect so it's clearer to see.

Encouraging organizations to embrace environmental, social and governance (ESG) models is no longer a hard sell. With issues such as climate change and social injustice are at the forefront of more people's minds, companies that have committed to ESG are simply providing what many of their customers, investors, shareholders and employees now want.

Furthermore, research has shown that a **strong ESG position creates long-term value:** companies boost competitiveness and financial performance, as well as their power to attract both employees and investors.

Firms evidently have the appetite for ESG, but with an estimated **600 ESG reporting provisions globally,** many agree that an "alphabet soup" of competing measures, frameworks and protocols are stifling company ambitions.

We built the IFS Cloud Sustainability Planner to make it simpler for you to collect, communicate and track ESG information across your teams and achieve sustainability goals. It's a Microsoft Teams Power App that enables you to demonstrate your commitment to sustainability by making it easier to demonstrate tangible progress and compliance.

Benefits

A true sustainability strategy must be company-wide – the IFS Cloud Sustainability Planner makes it quicker, easier and more enjoyable for everyone to get on board.

Achieve ESG goals
Greater visibility and control of ESG targets keeps you on track.

Drive business reputation and value
Demonstrate your commitment to sustainability by reporting progress against published goals.
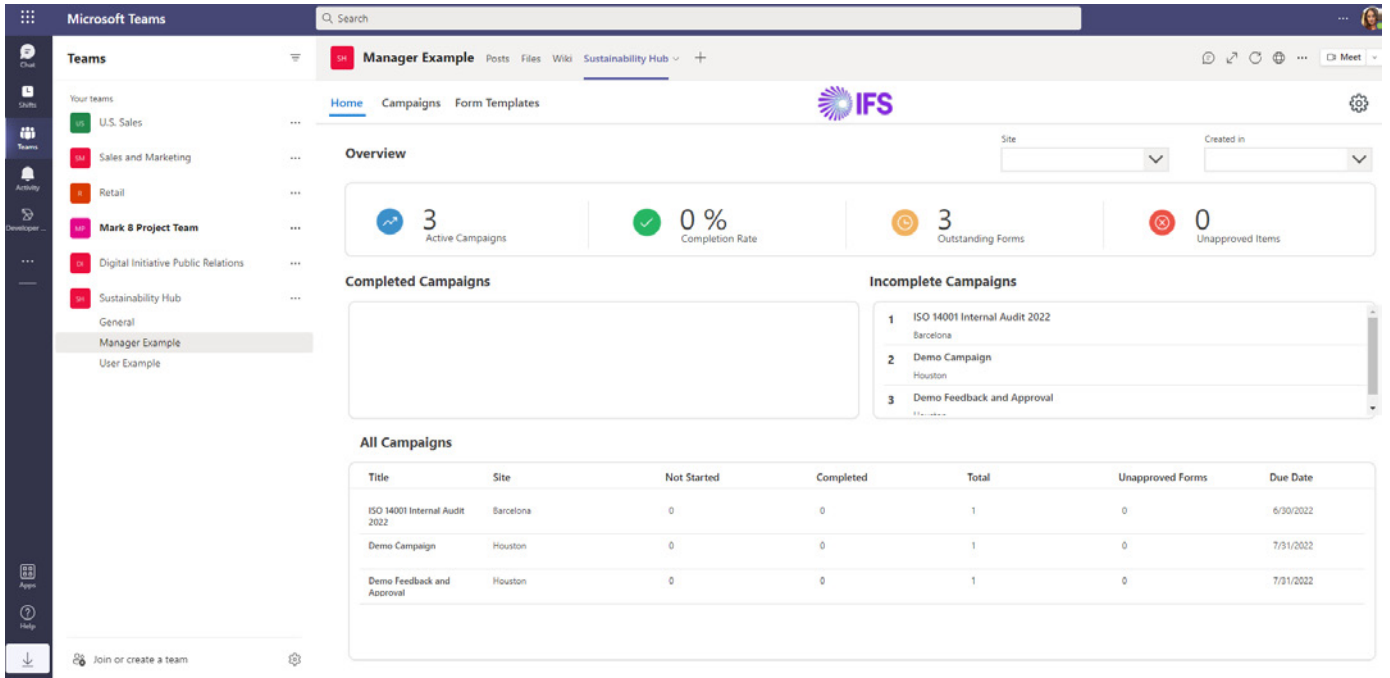

Demonstrate progress and compliance
ESG information is made clear and transparent for internal stakeholders and external auditors.

Maximize company resources
Managers can quickly identify any gaps or see where additional support might be needed.

Key capabilities

Tasks are divided by both role and environment. Managers request and review ESG information in the desktop version of the app, as well as track progress through intuitive dashboards. In the mobile app, employees compile and submit ESG information and explore any feedback they receive.

- Decide what ESG information you need to collect from employees by either designing your own form or choosing from our range of templates.

- Assign forms to relevant team members to complete, who view their assigned tasks and deadlines in the mobile app.

- Employees can enrich information with notes and photos before submitting the form.

- Approve or deny forms in the desktop environment, while also providing feedback and guidance to employees.

- Leverage the greenhouse gas calculation tool – one centralized place to collect, track and report progress of greenhouse gas emissions.
