

Streamline your business, grow customer service levels and unlock cost savings with IFS Cloud

Faster Time To Value

- IFS Cloud is a truly evergreen solution. Evergreen creates value for your business transformation by providing rapid access to continuous software innovations and improved experiences for your people and organization. Achieve an Evergreen state with IFS by regularly adopting updates to IFS Cloud on a schedule under your control.
- New customers are experiencing considerably faster time to value with IFS, with new customers able to go live within just 6 months.

6%

increase in labor efficiency through automation

80%

decrease in reporting efforts

20%

reduction in inventory carrying costs

The Total Economic Impact™ Of IFS Solutions Deployed In The Cloud, a commissioned study conducted by Forrester Consulting, 2023. Results are over three years for a composite organization based on interviewed customers.

On Time, On Budget

- IFS Cloud comes with pre-configured templates that can help to accelerate the implementation process. These templates can be customized to meet your specific needs and can help to reduce the time and cost of the implementation.
- IFS Cloud is built around open, standards-based REST APIs, simplifying the integration process with your systems and applications.

Truly Industry Specific

- IFS has a deep focus and extensive experience within specific industries and sub-industries, which is why IFS Cloud is designed with industry-specific functionality built into the product as standard. This approach enables the solution to address specific industry business challenges without the need for customization, providing customers with unparalleled efficiency and effectiveness.
- IFS Cloud offers a range of pre-defined industry-specific processes, industry-specific Lobbies (dashboards), accelerators, services, and more, tailored to meet the unique requirements of each industry.

“We’ve seen that IFS Cloud simply works ‘as is’ for the business process we need. I see other companies paying for costly ERP modifications, only to remove most of them after two or three years because they weren’t needed. With no need to modify the core, IFS Cloud gives us a cost-effective and evergreen platform.”

- Pekka Nurmi, Director of Corporate IT, Cimcorp

ERP capabilities in IFS Cloud

Production Planning

Enables manufacturing companies to integrate and embed intelligence in manufacturing processes all from a single platform. It provides optimal scheduling, planning coordination and execution processes as part of covering all aspects of the manufacturing cycle, from planning to shipment, no matter how complex or how many different modes.

Quality Management

Provides total quality management (TQM) including product quality control, SPC, audits, failure analysis, corrective actions and issue reporting. TQM is incredibly powerful as it leverages real time data from the shop-floor and uses variance sampling to simplify the process and drive time and cost savings.

Manufacturing Execution System (MES)

One part of a total solution for manufacturers that includes Manufacturing Operations all from a single platform.

Supply Chain Management

Makes it easier for you to operate your supply chain smoothly and efficiently all from a single platform. Includes a seamless collection of intelligent capabilities such as demand planning, sales, inventory replenishment, warehousing and shipment management.

Asset Management

IFS Cloud is a Gartner® Peer Insights™ Customers Choice for EAM Software. (With an Overall Rating of 4.3 out of 5 and a 91% Willingness to Recommend (based on 47 reviews, as of 30 April 2022).

Includes maintenance planning and scheduling optimization, this allows planners to optimize resources in real-time combining operational and maintenance plans on one optimized schedule.

Projects

Offers an intuitive, step-by-step workflow all within the same platform.

Service Management

IFS positioned highest on Ability to Execute and furthest on Completeness of Vision in 2022 Gartner® Magic Quadrant™ for FSM.

Has comprehensive use case support for service with industry depth. Our breadth of capabilities includes AI powered optimized and automated scheduling for maximum efficiency plus support for predictive, break-fix and both short and long cycle recurring maintenance and service tasks.

Embedded Innovation

Leverages embedded innovation that’s ready to use, providing tangible benefits from day one all from the same platform. Examples include Artificial Intelligence, Machine Learning, the Internet of Things, and Intelligent Automation.

Human Capital Management (HCM)

Manages the full employee lifecycle, from hire to retire all on a single platform.

Customer Relationship Management (CRM)

Key enabler to modern business growth all from a single platform.
